1. The purpose of this report is to provide a detailed description of the data collected during the field study. The data was collected over a period of six months, from January to June 2018. The study was conducted in the area of the Great Lakes, specifically in the Lake Michigan basin. The data was collected from a variety of sources, including interviews with local residents, observations of local wildlife, and analysis of local government records. The data was then analyzed using statistical methods to identify trends and patterns. The results of the study are presented in the following sections.
